Mandarinas Core + Flex System

Simple guide for the new rotation system: weekly spots, Finals snake draft, Flex promotion chances, and how the app helps everyone follow it.

Core first | Flex rotates | Finals stay snake draft

Every week

1. Weekly Spots

Core
Main spots fill first

Flex
Shared spots rotate

Sub
Extra cover if needed

Core players get first priority. After Core, the shared open spots go to Flex players in order.

Normal weeks stay fairness-first: fewer turns means higher Flex.

Quick summary

Core first. Flex rotates next. Subs fill the remaining space. The app shows who is next.

End of season

2. Finals Still Use Snake Draft

Round 1

1	2	3	4

Round 2

4	3	2	1

Still decides top Core

Finals still use snake draft, and they still help decide the top Core players.

Finals now also help rank the Flex group.

Final matchday

Season results matter more at the end, so performance becomes more important as the season closes.

Promotion and reward

3. What Players Are Playing For

Flex #2
Core chance

Flex #1
Core chance

Core #1
Wins jersey

The top 2 Flex players after Finals get the chance to move up to Core.

The top Core player wins the jersey, so Core players still have a clear prize to chase.

Why it matters

Both tiers still have something to play for: Flex can move up, and Core still has a top reward.

Transparency

4. How the App Helps

Flex queue
Who is next

Current tier
Core / Flex / Sub

Next tier
Where the data points

Season stats
Attendance and results

The app shows the live Flex queue, so players can see who is next without guessing.

It also shows current tier, suggested next tier, and the attendance and season results.

What the app does for the club

Shows the queue, shows the recommendation, and makes the process easier to explain.
